

Before takeoff at Nagoya

## "Program Update"

### MRJ arrives at flight test center in the US

The 2nd MRJ (Mitsubishi Regional Jet) Flight Test Aircraft (FTA-2) arrived at Grant County International Airport on Dec. 19 local time at Moses Lake in Washington, our flight test center in the U.S. This was the third MRJ ferry flight to the U.S. following flights for FTA-1 and FTA-4.

Guam International Airport

Majuro International Airport  
in Republic of the Marshall Islands

### Did you know?

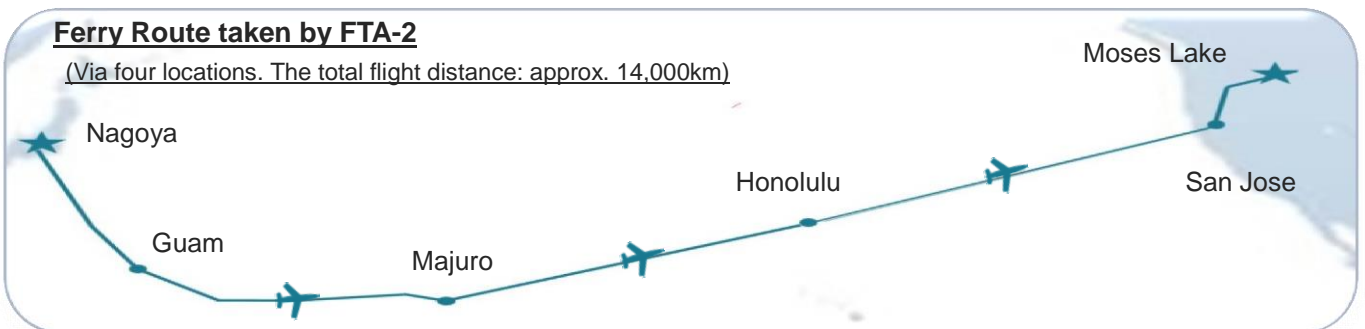

In addition to the pilots, engineers observing monitors sat at the rear of the MRJ during the ferry flight. They support flight safety by watching over a wide range of data collected from the MRJ such as the speed, attitude, temperature and vibration, and confirming that the data is normal.

### Ferry Route taken by FTA-2

(Via four locations. The total flight distance: approx. 14,000km)

## "Hot Topic"

### Introducing MRJ at Moses Lake

On the afternoon of December 4 (local time), in the hangar of Moses Lake Flight Test Center (MFC), our flight test center in Grant County International Airport, approximately 170 local residents, representatives of local companies, aviation officials, employees and their families were invited to an exhibit of MRJ's FTA-1 and FTA-4. The exhibit was held to express our gratitude to everyone who has supported the project. Many of the participants said they were pleased at being invited to view the aircraft, and expressed their admiration for the beautiful form of the airframes.
